Our Customers**VORES
KUNDER**

The following is an excerpt of some of the many tasks that we have landed over the past period for the benefit of us all.

Energy Fyn

It is with great pleasure that I can inform you that we have made a Framework Agreement with Energi Fyn.

This will have an impact on both Aftersales (Customer Connector) and Project.

We have just received a fairly large single case (project) in Næsbyhoved (Broby) north of Odense, starting this autumn. The case will employ approximately 12 men until the summer holidays of 2024.

Through Energi Fyn, we have got Street Light project in Fredericia, which is underway, as well as the Operation & maintenance task in Vejen municipality together with Energi Fyn.

Aftersales has started by making customer sockets – we expect to make approx. 50 sockets per week.

Ewii.

The fibre agreement with Ewii has been extended by 12 months.

The Street Light and Charging Point agreement with Ewii has been extended by 12 months.

Bravida

Exciting tasks have come in from Bravida, where we will dig cables down to security cameras in 32 selected locations in the South Region.

The tasks will start this autumn and continue into the beginning of 2024.

TSG.

We have been commissioned to set up charging stations for TSG at 12 Shell stations in the South Region. The tasks are to be started up this autumn.

Norlys

Different types of tasks are still coming in well, ranging from housing associations to Customer Sockets.

Atea

Through our agreement with Atea, burial of fiber will be started at several housing associations on Funen.

The above is only an excerpt of what we work with in the office – new opportunities are constantly emerging that we are pursuing, so that there will also be tasks for Svane in the future

Wiring Info App

Quality assurance of what we do in our daily lives takes up more and more space – therefore it is important that we document every single task we perform.
Many of you use the wiring info app as part of your daily life.

Remember to take before – during – after pictures, it is much easier to document what we have done, as well as show what it looked like before we started and what the result looked like when we were finished.

So REMEMBER Photo before – during – after!

Sweeper

As a test, we have bought a sweeper from P. Lindberg for our new project on Funen.
We will test that it lives up to our expectations and that it can facilitate the work on the sites before investing in more.

Roadside signage

In this edition of Svane News, we focus on signage at our workplaces.
It is extremely important that we get the sign right and that this is prioritized as an important and essential part of our work.

You must do it for your own safety, as well as for other road users.
Safety for all of you who work by the road must be given high focus.

See the link below – in relation to guidance for good working environment / safety.
If you are in doubt, you are always welcome to contact your immediate manager in relation to the specific tasks you are working on.

Safety comes before everything else.

New cars

Then the first car finally arrived – there has been a really long wait / delivery time. The first came in week 39 – a Fiat Ducato Box Truck (blowing truck).

In addition, the first Renault Master was delivered in week 39 (pictured)

There should be 3 more Renault masts delivered in week 40, and hopefully 2 more within the next few weeks.

The workshop informs about the reshuffle that will take place in relation to who will have new cars.

The boss on tour

On Thursday, 28-09-2023, I had taken a day off the calendar to get out and see what you are doing in the field.

I visited 3 places in Ribe, Kolding and Fredericia.

I really got to talk to many during the day at the 5 places I visited.

A pleasure to see how it is approached – nice work being done – really impressed 😊.

Thank you so much for your commitment.

You should all really have huge praise for this.

Keep up the good work!

Velkommen til Minuba

Minuba

Integration with Minuba is ongoing - Yes 😊

Here at the office, we have now received training several times, so we get to know the system well.

Over the next period, all employees at Svane will be invited to meetings/training.

These mini-courses will be held near where you live/work. It can be an inn or other.

You will be summoned in the next 14 days.

The idea is that for employees in the field it is held by 7 times, with one last time for follow-up.

All employees are now set up in the system. At some point, you will receive an email (private email for someone) with a Link to Minuba, where code must be created.

App is then downloaded

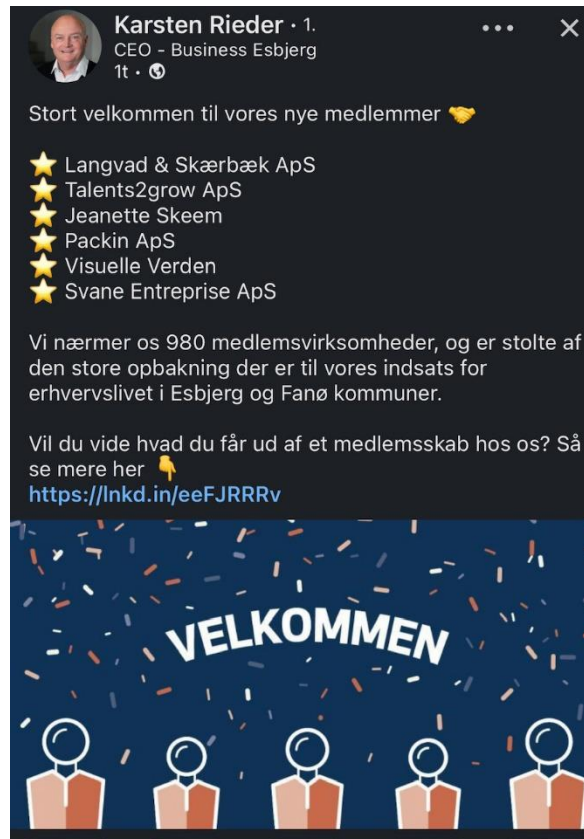

For you in the field, it will be significantly easier in the future to register your hours on the projects you are working on, with an App on your phone.

More info and invitation about this later 😊 .

Business Esbjerg

Svane has now become part of Business Esbjerg 😊 .

Screenshot from LinkedIn

As always, I would like to hear from you if you have input, good stories from everyday life or good tips colleague-to-colleague 😊. If you have any good pictures, you are welcome to send them to me.

Svane News is published as a Danish and English version. The last edition was also made in a Polish version, which was well received, and this time Svane is expanding the editorial staff with a German version as well. They are still based on the translate function, so there may be some translations that will be accordingly.

Thank you all for your daily efforts for Svane Entreprise 😊.

Torben Ilsøe Nielsen
